CSM Cybersecurity Virtual Club

Change has come, the club has gone virtual. Everything has moved online and our data is more vulnerable than ever. The CyberHawks can teach you skills to help protect data at home and work. We work as a team to learn cybersecurity, because teamwork is an essential part of cybersecurity. Anyone can join CSM's Cybersecurity club. No experience needed to get into the club.

Some of the activities we participate in are capture the flag (CTF) competitions, field trips (virtual and physical), and participate in virtual escape. Also, there will be the ResumeSHOP every semester and every member can participate in our local Women in Cybersecurity (WiCys) Chapter on campus.

WHAT'S NEW

NEW TECHNOLOGY CLUB

Introducing Association for
Computing Machinery - Women

THE ANATOMY OF A NETWORK

MAGIC CTF COMPETITION

HOW DO I JOIN?

Details are inside!

New Club ACM-W

We are excited to announce a new club to CSM's Student Life Activities. The Association for Computing Machinery - Women also know ACM-W. It is a new technology club focusing on increasing women's presences in technology fields. The club is open to all (not just women). Check them out on the 2nd and 4th Friday of every month. For more info go to www.women.acm.org.

The Anatomy of a Network

Many, many devices we have today are connected amongst themselves or even to the Internet. However, how well do you understand a network of devices? Coming in May or June 2021, club member Gabrielle McDonald will dissect a self-made network to discuss how it all really ticks. More details coming soon.
