

Johns Hopkins School of Medical Imaging Nuclear Medicine Technology

- Complete an Associate's Degree (Associate of Science in Pre-Professional Health Science: General Concentration is the most efficient degree) before the June start date of the program.
- Complete the following pre-requisite courses with a C or better and a combined GPA in all prerequisite coursework of 3.0 or better:
 - BIO-2170 (previously BIO-2070 and BIO-2070L)
 - BIO-2180 (previously BIO-2080 and BIO-2080L)
 - PHY-1110 (previously PHY-1010 and PHY-1010L)
 - CHE-1200 and CHE-1200L
 - MTH-1120 or higher
 - HEA-1105
 - COM-1010 or COM-1650
 - ENG-1010
- Be 18 years old at the time of matriculation.
- Be a citizen of the United States of America, or a permanent resident (hold a green card).
- Two letters of recommendation using the provided form in the applications:
 - One from a college science or math instructor
 - One from your present employer.
- Statement of intent, in 200 words or less, stating why you are choosing a career in the health care profession and your specific career goals in medical imaging.
- Transcripts documenting all post high school education. Foreign transcripts must be evaluated by one of the agencies in the United States that performs academic credential evaluations.
